Pain 135 (2008) 320–324

PAIN

www.elsevier.com/locate/pain

Subject Index to Volume 135 (2008)

Aβ-fibre
Spread of excitation across modality borders in spinal dorsal horn of neuropathic rats, **135**, 300
Alcohol abuse
The relation between multiple pains and mental disorders: Results from the World Mental Health Surveys, **135**, 82
Allodynia
Characterization of a model of persistent postoperative pain evoked by skin/muscle incision and retraction (SMIR), **135**, 119
Allodynia
Chemotherapy-evoked neuropathic pain: Abnormal spontaneous discharge in A-fiber and C-fiber primary afferent neurons and its suppression by acetyl-L-carnitine, **135**, 262
Allodynia
Pharmacological dissection of the paradoxical pain induced by a thermal grill, **135**, 291
Allodynia
Spread of excitation across modality borders in spinal dorsal horn of neuropathic rats, **135**, 300
Analgesia
Effects of opioid blockade on the modulation of pain and mood by sweet taste and blood pressure in young adults, **135**, 75
Anticipation
Modulation of pain ratings by expectation and uncertainty: Behavioral characteristics and anticipatory neural correlates, **135**, 240
Anxiety
Psychosocial predictors of health-related quality of life and health service utilisation in people with chronic low back pain, **135**, 142
Anxiety
The relation between multiple pains and mental disorders: Results from the World Mental Health Surveys, **135**, 82
Arousal
Recognition and discrimination of prototypical dynamic expressions of pain and emotions, **135**, 55
Assessment
The impact of chronic pain in children and adolescents: Development and initial validation of a child and parent version of the Pain Experience Questionnaire, **135**, 251
Attitudes and beliefs
How does the self-reported clinical management of patients with low back pain relate to the attitudes and beliefs of health care practitioners? A survey of UK general practitioners and physiotherapists, **135**, 187
Autotomy
pain2: A neuropathic pain QTL identified on rat chromosome 2, **135**, 92
Barriers to pain control
Patient training in cancer pain management using integrated print and video materials: A multisite randomized controlled trial, **135**, 175
Bee venom
Peripheral involvement of PKA and PKC in subcutaneous bee venom-induced persistent nociception, mechanical hyperalgesia, and inflammation in rats, **135**, 31
Blood pressure
Changes in cardiovascular parameters and plasma norepinephrine level in rats after chronic constriction injury on the sciatic nerve, **135**, 221
Blood pressure
Effects of opioid blockade on the modulation of pain and mood by sweet taste and blood pressure in young adults, **135**, 75
Ca^{2+}-imaging
Spread of excitation across modality borders in spinal dorsal horn of neuropathic rats, **135**, 300
Cancer pain
Patient training in cancer pain management using integrated print and video materials: A multisite randomized controlled trial, **135**, 175
Capsaicin
Homologous and heterologous desensitization of capsaicin and mustard oil responses utilize different cellular pathways in nociceptors, **135**, 271
Cardiovascular parameters
Changes in cardiovascular parameters and plasma norepinephrine level in rats after chronic constriction injury on the sciatic nerve, **135**, 221
Catastrophizing
Stage of chronicity and treatment response in patients with musculoskeletal injuries and concurrent symptoms of depression, **135**, 151
Central nervous system
Characterization of cell proliferation in rat spinal cord following peripheral nerve injury and the relationship with neuropathic pain, **135**, 37
Chemotherapy
Chemotherapy-evoked neuropathic pain: Abnormal spontaneous discharge in A-fiber and C-fiber primary afferent neurons and its suppression by acetyl-L-carnitine, **135**, 262
Child report
The impact of chronic pain in children and adolescents: Development and initial validation of a child and parent version of the Pain Experience Questionnaire, **135**, 251
Chronic constriction injury
Changes in cardiovascular parameters and plasma norepinephrine level in rats after chronic constriction injury on the sciatic nerve, **135**, 221
Chronic disease
A prognostic approach to defining chronic pain: Replication in a UK primary care low back pain population, **135**, 48

doi:10.1016/S0304-3959(08)00099-7

Chronic pain
Stage of chronicity and treatment response in patients with musculoskeletal injuries and concurrent symptoms of depression, **135**, 151
Classification
A prognostic approach to defining chronic pain: Replication in a UK primary care low back pain population, **135**, 48
Cohort studies
A prognostic approach to defining chronic pain: Replication in a UK primary care low back pain population, **135**, 48
Cold
Nociceptive sensations evoked from 'spots' in the skin by mild cooling and heating, **135**, 196
Cold receptors
Nociceptive sensations evoked from 'spots' in the skin by mild cooling and heating, **135**, 196
Cross national
The relation between multiple pains and mental disorders: Results from the World Mental Health Surveys, **135**, 82
Depression
Psychosocial predictors of health-related quality of life and health service utilisation in people with chronic low back pain, **135**, 142
Depression
Stage of chronicity and treatment response in patients with musculoskeletal injuries and concurrent symptoms of depression, **135**, 151
Depression
The relation between multiple pains and mental disorders: Results from the World Mental Health Surveys, **135**, 82
Descending inhibitory system
Electroacupuncture-induced analgesia in a rat model of ankle sprain pain is mediated by spinal α-adrenoceptors, **135**, 11
Disability
Stage of chronicity and treatment response in patients with musculoskeletal injuries and concurrent symptoms of depression, **135**, 151
Dorsal horn
Neurotensin-produced antinociception in the rostral ventromedial medulla is partially mediated by spinal cord norepinephrine, **135**, 280
Dorsal root ganglia (DRG) nociceptor
Proinflammatory cytokines mediating burn-injury pain, **135**, 98
Electroacupuncture
Electroacupuncture-induced analgesia in a rat model of ankle sprain pain is mediated by spinal α-adrenoceptors, **135**, 11
Emotion
Recognition and discrimination of prototypical dynamic expressions of pain and emotions, **135**, 55
Epidural analgesia
A randomised double blind trial of the effect of pre-emptive epidural ketamine on persistent pain after lower limb amputation, **135**, 108
Expectancy
Modulation of pain ratings by expectation and uncertainty: Behavioral characteristics and anticipatory neural correlates, **135**, 240
Facial expression
Recognition and discrimination of prototypical dynamic expressions of pain and emotions, **135**, 55
FACS
Recognition and discrimination of prototypical dynamic expressions of pain and emotions, **135**, 55
Fear of movement
Stage of chronicity and treatment response in patients with musculoskeletal injuries and concurrent symptoms of depression, **135**, 151
Fear-avoidance beliefs
Psychosocial predictors of health-related quality of life and health service utilisation in people with chronic low back pain, **135**, 142
fMRI
The influence of simultaneous ratings on cortical BOLD effects during painful and non-painful stimulation, **135**, 131
Gastrointestinal tract
Distribution and properties of visceral nociceptive neurons in rabbit cingulate cortex, **135**, 160
Glia progenitors
Characterization of cell proliferation in rat spinal cord following peripheral nerve injury and the relationship with neuropathic pain, **135**, 37
gp130
Proinflammatory cytokines mediating burn-injury pain, **135**, 98
Health care practitioners
How does the self-reported clinical management of patients with low back pain relate to the attitudes and beliefs of health care practitioners? A survey of UK general practitioners and physiotherapists, **135**, 187
Heart rate
Changes in cardiovascular parameters and plasma norepinephrine level in rats after chronic constriction injury on the sciatic nerve, **135**, 221
Heat
Nociceptive sensations evoked from 'spots' in the skin by mild cooling and heating, **135**, 196
Human pain model
Pharmacological dissection of the paradoxical pain induced by a thermal grill, **135**, 291
Hyperalgesia
Characterization of a model of persistent postoperative pain evoked by skin/muscle incision and retraction (SMIR), **135**, 119
Hyperalgesia
Chemotherapy-evoked neuropathic pain: Abnormal spontaneous discharge in A-fiber and C-fiber primary afferent neurons and its suppression by acetyl-L-carnitine, **135**, 262
Hyperalgesia
IL-1ra alleviates inflammatory hyperalgesia through preventing phosphorylation of NMDA receptor NR-1 subunit in rats, **135**, 232
IL-1β
IL-1ra alleviates inflammatory hyperalgesia through preventing phosphorylation of NMDA receptor NR-1 subunit in rats, **135**, 232
IL-6
Proinflammatory cytokines mediating burn-injury pain, **135**, 98
Inference
Modulation of pain ratings by expectation and uncertainty: Behavioral characteristics and anticipatory neural correlates, **135**, 240
Inflammation
Peripheral involvement of PKA and PKC in subcutaneous bee venom-induced persistent nociception, mechanical hyperalgesia, and inflammation in rats, **135**, 31
Insular cortex
The influence of simultaneous ratings on cortical BOLD effects during painful and non-painful stimulation, **135**, 131
Interleukin (IL) 1-β
Proinflammatory cytokines mediating burn-injury pain, **135**, 98
Ketamine
A randomised double blind trial of the effect of pre-emptive epidural ketamine on persistent pain after lower limb amputation, **135**, 108
Ketamine
Pharmacological dissection of the paradoxical pain induced by a thermal grill, **135**, 291

Late whiplash syndrome
A systematic literature review of psychological factors and the development of late whiplash syndrome, **135**, 20
Limbic cortex
Distribution and properties of visceral nociceptive neurons in rabbit cingulate cortex, **135**, 160
Low back pain
How does the self-reported clinical management of patients with low back pain relate to the attitudes and beliefs of health care practitioners? A survey of UK general practitioners and physiotherapists, **135**, 187
Low back pain
Psychosocial predictors of health-related quality of life and health service utilisation in people with chronic low back pain, **135**, 142
Low back pain
Proinflammatory cytokines mediating burn-injury pain, **135**, 98
Mechanical hyperalgesia
Peripheral involvement of PKA and PKC in subcutaneous bee venom-induced persistent nociception, mechanical hyperalgesia, and inflammation in rats, **135**, 31
Mechanical stimulation
The influence of simultaneous ratings on cortical BOLD effects during painful and non-painful stimulation, **135**, 131
Microglia
Characterization of cell proliferation in rat spinal cord following peripheral nerve injury and the relationship with neuropathic pain, **135**, 37
Mixed pain
Pseudoradicular and radicular low-back pain – A disease continuum rather than different entities? Answers from quantitative sensory testing, **135**, 65
Modality borders
Spread of excitation across modality borders in spinal dorsal horn of neuropathic rats, **135**, 300
Mood
Effects of opioid blockade on the modulation of pain and mood by sweet taste and blood pressure in young adults, **135**, 75
Motor activity
Changes in cardiovascular parameters and plasma norepinephrine level in rats after chronic constriction injury on the sciatic nerve, **135**, 221
Multiple pains
The relation between multiple pains and mental disorders: Results from the World Mental Health Surveys, **135**, 82
Musculoskeletal pain
Stage of chronicity and treatment response in patients with musculoskeletal injuries and concurrent symptoms of depression, **135**, 151
Mustard oil
Homologous and heterologous desensitization of capsaicin and mustard oil responses utilize different cellular pathways in nociceptors, **135**, 271
Naloxone
Electroacupuncture-induced analgesia in a rat model of ankle sprain pain is mediated by spinal α-adrenoceptors, **135**, 11
Naloxone
Pharmacological dissection of the paradoxical pain induced by a thermal grill, **135**, 291
Naltrexone
Effects of opioid blockade on the modulation of pain and mood by sweet taste and blood pressure in young adults, **135**, 75
Neuroanatomy
Distribution and properties of visceral nociceptive neurons in rabbit cingulate cortex, **135**, 160
Neuroinflammation
Characterization of cell proliferation in rat spinal cord following peripheral nerve injury and the relationship with neuropathic pain, **135**, 37
Neuroma model
pain2: A neuropathic pain QTL identified on rat chromosome 2, **135**, 92
Neuropathic pain
pain2: A neuropathic pain QTL identified on rat chromosome 2, **135**, 92
Neuropathic pain
Changes in cardiovascular parameters and plasma norepinephrine level in rats after chronic constriction injury on the sciatic nerve, **135**, 221
Neuropathic pain
Pseudoradicular and radicular low-back pain – A disease continuum rather than different entities? Answers from quantitative sensory testing, **135**, 65
Neuropathy
Chemotherapy-evoked neuropathic pain: Abnormal spontaneous discharge in A-fiber and C-fiber primary afferent neurons and its suppression by acetyl-L-carnitine, **135**, 262
Neurophysiology
Distribution and properties of visceral nociceptive neurons in rabbit cingulate cortex, **135**, 160
Neurotensin
Neurotensin-produced antinociception in the rostral ventromedial medulla is partially mediated by spinal cord norepinephrine, **135**, 280
NMDA receptor
IL-1ra alleviates inflammatory hyperalgesia through preventing phosphorylation of NMDA receptor NR-1 subunit in rats, **135**, 232
NMDA receptors
A randomised double blind trial of the effect of pre-emptive epidural ketamine on persistent pain after lower limb amputation, **135**, 108
Nociception
Modulation of pain ratings by expectation and uncertainty: Behavioral characteristics and anticipatory neural correlates, **135**, 240
Nociception
Neurotensin-produced antinociception in the rostral ventromedial medulla is partially mediated by spinal cord norepinephrine, **135**, 280
Nociceptive flinching
Peripheral involvement of PKA and PKC in subcutaneous bee venom-induced persistent nociception, mechanical hyperalgesia, and inflammation in rats, **135**, 31
Nociceptor
Homologous and heterologous desensitization of capsaicin and mustard oil responses utilize different cellular pathways in nociceptors, **135**, 271
Nociceptors
Nociceptive sensations evoked from 'spots' in the skin by mild cooling and heating, **135**, 196
Noradrenergic inhibitory system
Electroacupuncture-induced analgesia in a rat model of ankle sprain pain is mediated by spinal α-adrenoceptors, **135**, 11
Norepinepherine
Neurotensin-produced antinociception in the rostral ventromedial medulla is partially mediated by spinal cord norepinephrine, **135**, 280
Norepinephrine
Changes in cardiovascular parameters and plasma norepinephrine level in rats after chronic constriction injury on the sciatic nerve, **135**, 221

Nucleus raphe magnus
Neurotensin-produced antinociception in the rostral ventromedial medulla is partially mediated by spinal cord norepinephrine, **135**, 280
Operation
Characterization of a model of persistent postoperative pain evoked by skin/muscle incision and retraction (SMIR), **135**, 119
Opioid reluctance
Patient training in cancer pain management using integrated print and video materials: A multisite randomized controlled trial, **135**, 175
Paclitaxel
Chemotherapy-evoked neuropathic pain: Abnormal spontaneous discharge in A-fiber and C-fiber primary afferent neurons and its suppression by acetyl-L-carnitine, **135**, 262
Pain
A prognostic approach to defining chronic pain: Replication in a UK primary care low back pain population, **135**, 48
Pain
Chemotherapy-evoked neuropathic pain: Abnormal spontaneous discharge in A-fiber and C-fiber primary afferent neurons and its suppression by acetyl-L-carnitine, **135**, 262
Pain
Distribution and properties of visceral nociceptive neurons in rabbit cingulate cortex, **135**, 160
Pain
Effects of opioid blockade on the modulation of pain and mood by sweet taste and blood pressure in young adults, **135**, 75
Pain
Homologous and heterologous desensitization of capsaicin and mustard oil responses utilize different cellular pathways in nociceptors, **135**, 271
Pain
Nociceptive sensations evoked from 'spots' in the skin by mild cooling and heating, **135**, 196
Pain
Proinflammatory cytokines mediating burn-injury pain, **135**, 98
Pain
Recognition and discrimination of prototypical dynamic expressions of pain and emotions, **135**, 55
Pain
Spread of excitation across modality borders in spinal dorsal horn of neuropathic rats, **135**, 300
Pain
Stage of chronicity and treatment response in patients with musculoskeletal injuries and concurrent symptoms of depression, **135**, 151
Pain
The influence of simultaneous ratings on cortical BOLD effects during painful and non-painful stimulation, **135**, 131
pain1
pain2: A neuropathic pain QTL identified on rat chromosome 2, **135**, 92
pain2
pain2: A neuropathic pain QTL identified on rat chromosome 2, **135**, 92
Pain QTL
pain2: A neuropathic pain QTL identified on rat chromosome 2, **135**, 92
Parental report
The impact of chronic pain in children and adolescents: Development and initial validation of a child and parent version of the Pain Experience Questionnaire, **135**, 251
Patient education
Patient training in cancer pain management using integrated print and video materials: A multisite randomized controlled trial, **135**, 175
Patient training
Patient training in cancer pain management using integrated print and video materials: A multisite randomized controlled trial, **135**, 175
Patient–physician communication
Patient training in cancer pain management using integrated print and video materials: A multisite randomized controlled trial, **135**, 175
Pediatric pain
The impact of chronic pain in children and adolescents: Development and initial validation of a child and parent version of the Pain Experience Questionnaire, **135**, 251
Peripheral nerve injury
Spread of excitation across modality borders in spinal dorsal horn of neuropathic rats, **135**, 300
Peripheral sensitization
Peripheral involvement of PKA and PKC in subcutaneous bee venom-induced persistent nociception, mechanical hyperalgesia, and inflammation in rats, **135**, 31
Phantom limb
A randomised double blind trial of the effect of pre-emptive epidural ketamine on persistent pain after lower limb amputation, **135**, 108
Phentolamine
Electroacupuncture-induced analgesia in a rat model of ankle sprain pain is mediated by spinal α-adrenoceptors, **135**, 11
Phosphorylation
IL-1ra alleviates inflammatory hyperalgesia through preventing phosphorylation of NMDA receptor NR-1 subunit in rats, **135**, 232
Postsurgical pain
Characterization of a model of persistent postoperative pain evoked by skin/muscle incision and retraction (SMIR), **135**, 119
Practice behaviour
How does the self-reported clinical management of patients with low back pain relate to the attitudes and beliefs of health care practitioners? A survey of UK general practitioners and physiotherapists, **135**, 187
Prediction
Modulation of pain ratings by expectation and uncertainty: Behavioral characteristics and anticipatory neural correlates, **135**, 240
Prognosis
A prognostic approach to defining chronic pain: Replication in a UK primary care low back pain population, **135**, 48
Prognosis
A systematic literature review of psychological factors and the development of late whiplash syndrome, **135**, 20
Prospective studies
A prognostic approach to defining chronic pain: Replication in a UK primary care low back pain population, **135**, 48
Prospective study
Psychosocial predictors of health-related quality of life and health service utilisation in people with chronic low back pain, **135**, 142
Protein kinases
Peripheral involvement of PKA and PKC in subcutaneous bee venom-induced persistent nociception, mechanical hyperalgesia, and inflammation in rats, **135**, 31
Pseudoradiculopathy
Pseudoradicular and radicular low-back pain – A disease continuum rather than different entities? Answers from quantitative sensory testing, **135**, 65
Psychological factors
A systematic literature review of psychological factors and the development of late whiplash syndrome, **135**, 20
Psychophysical
Pharmacological dissection of the paradoxical pain induced by a thermal grill, **135**, 291

Psychophysics
Nociceptive sensations evoked from 'spots' in the skin by mild cooling and heating, **135**, 196
Psychosocial impact
The impact of chronic pain in children and adolescents: Development and initial validation of a child and parent version of the Pain Experience Questionnaire, **135**, 251
Pulse interval variability
Changes in cardiovascular parameters and plasma norepinephrine level in rats after chronic constriction injury on the sciatic nerve, **135**, 221
QST
Pseudoradicular and radicular low-back pain – A disease continuum rather than different entities? Answers from quantitative sensory testing, **135**, 65
Quality of life
Psychosocial predictors of health-related quality of life and health service utilisation in people with chronic low back pain, **135**, 142
Quantitative sensory testing
Pseudoradicular and radicular low-back pain – A disease continuum rather than different entities? Answers from quantitative sensory testing, **135**, 65
Questionnaire
The impact of chronic pain in children and adolescents: Development and initial validation of a child and parent version of the Pain Experience Questionnaire, **135**, 251
Radiculopathy
Pseudoradicular and radicular low-back pain – A disease continuum rather than different entities? Answers from quantitative sensory testing, **135**, 65
Randomized controlled trial
Patient training in cancer pain management using integrated print and video materials: A multisite randomized controlled trial, **135**, 175
Rat
Characterization of a model of persistent postoperative pain evoked by skin/muscle incision and retraction (SMIR), **135**, 119
Rat
IL-1ra alleviates inflammatory hyperalgesia through preventing phosphorylation of NMDA receptor NR-1 subunit in rats, **135**, 232
Rating
The influence of simultaneous ratings on cortical BOLD effects during painful and non-painful stimulation, **135**, 131
RCT
A randomised double blind trial of the effect of pre-emptive epidural ketamine on persistent pain after lower limb amputation, **135**, 108
Recognition
Recognition and discrimination of prototypical dynamic expressions of pain and emotions, **135**, 55
Rehabilitation
Stage of chronicity and treatment response in patients with musculoskeletal injuries and concurrent symptoms of depression, **135**, 151
Return to work
Stage of chronicity and treatment response in patients with musculoskeletal injuries and concurrent symptoms of depression, **135**, 151
Risk
A prognostic approach to defining chronic pain: Replication in a UK primary care low back pain population, **135**, 48
Sensory nociception
Distribution and properties of visceral nociceptive neurons in rabbit cingulate cortex, **135**, 160
Serotonin
Neurotensin-produced antinociception in the rostral ventromedial medulla is partially mediated by spinal cord norepinephrine, **135**, 280
Social adversity
Psychosocial predictors of health-related quality of life and health service utilisation in people with chronic low back pain, **135**, 142
Spinal cord
IL-1ra alleviates inflammatory hyperalgesia through preventing phosphorylation of NMDA receptor NR-1 subunit in rats, **135**, 232
Spinal cord
Spread of excitation across modality borders in spinal dorsal horn of neuropathic rats, **135**, 300
Surgery
Characterization of a model of persistent postoperative pain evoked by skin/muscle incision and retraction (SMIR), **135**, 119
Survey
How does the self-reported clinical management of patients with low back pain relate to the attitudes and beliefs of health care practitioners? A survey of UK general practitioners and physiotherapists, **135**, 187
Sweet taste
Effects of opioid blockade on the modulation of pain and mood by sweet taste and blood pressure in young adults, **135**, 75
Sympathetic nervous system
Changes in cardiovascular parameters and plasma norepinephrine level in rats after chronic constriction injury on the sciatic nerve, **135**, 221
Temperature
Nociceptive sensations evoked from 'spots' in the skin by mild cooling and heating, **135**, 196
Thermal injury
Proinflammatory cytokines mediating burn-injury pain, **135**, 98
Trigeminal
Homologous and heterologous desensitization of capsaicin and mustard oil responses utilize different cellular pathways in nociceptors, **135**, 271
TRP channels
Nociceptive sensations evoked from 'spots' in the skin by mild cooling and heating, **135**, 196
TRPA1
Homologous and heterologous desensitization of capsaicin and mustard oil responses utilize different cellular pathways in nociceptors, **135**, 271
TRPV1
Homologous and heterologous desensitization of capsaicin and mustard oil responses utilize different cellular pathways in nociceptors, **135**, 271
Tumor necrosis factor-α
Proinflammatory cytokines mediating burn-injury pain, **135**, 98
Valence
Recognition and discrimination of prototypical dynamic expressions of pain and emotions, **135**, 55
Vincristine
Chemotherapy-evoked neuropathic pain: Abnormal spontaneous discharge in A-fiber and C-fiber primary afferent neurons and its suppression by acetyl-L-carnitine, **135**, 262
Warm receptors
Nociceptive sensations evoked from 'spots' in the skin by mild cooling and heating, **135**, 196
Warmth
Nociceptive sensations evoked from 'spots' in the skin by mild cooling and heating, **135**, 196
Weight-bearing force
Electroacupuncture-induced analgesia in a rat model of ankle sprain pain is mediated by spinal α-adrenoceptors, **135**, 11
Work disability
Stage of chronicity and treatment response in patients with musculoskeletal injuries and concurrent symptoms of depression, **135**, 151

Contents to Volume 135 (2008)

Numbers 1–2 – March 2008

EDITORIALS

Patient education about cancer pain management: How much time is enough?
C. Miaskowski (USA) 1

Attitudes and beliefs of health care providers: Extending the fear-avoidance model
R.W.J.G. Ostelo, J.W.S. Vlaeyen (The Netherlands) 3

Low threshold nociceptors: A challenge to sensory physiology
D. Yarnitsky (Israel) 5

TOPICAL REVIEW

Clinical and pre-clinical pain assessment: Are we measuring the same thing?
C.J. Vierck, P.T. Hansson, R.P. Yezierski (USA, Sweden) 7

RESEARCH PAPERS

Electroacupuncture-induced analgesia in a rat model of ankle sprain pain is mediated by spinal α-adrenoceptors
S.T. Koo, K.S. Lim, K. Chung, H. Ju, J.M. Chung (Republic of Korea, USA) 11

A systematic literature review of psychological factors and the development of late whiplash syndrome
E. Williamson, M. Williams, S. Gates, S.E. Lamb (UK) 20

Peripheral involvement of PKA and PKC in subcutaneous bee venom-induced persistent nociception, mechanical hyperalgesia, and inflammation in rats
H.-S. Chen, J. Lei, X. He, F. Qu, Y. Wang, W.-W. Wen, H.-J. You, L. Arendt-Nielsen (PR China, Denmark) 31

Characterization of cell proliferation in rat spinal cord following peripheral nerve injury and the relationship with neuropathic pain
S. Echeverry, X.Q. Shi, J. Zhang (Canada) 37

A prognostic approach to defining chronic pain: Replication in a UK primary care low back pain population
K.M. Dunn, P.R. Croft, C.J. Main, M. Von Korff (UK, USA) 48

Recognition and discrimination of prototypical dynamic expressions of pain and emotions
D. Simon, K.D. Craig, F. Gosselin, P. Belin, P. Rainville (Germany, Canada, UK) 55

Pseudoradicular and radicular low-back pain – A disease continuum rather than different entities? Answers from quantitative sensory testing
R. Freynhagen, R. Rolke, R. Baron, T.R. Tölle, A.-K. Rutjes, S. Schu, R.-D. Treede (Germany) 65

Effects of opioid blockade on the modulation of pain and mood by sweet taste and blood pressure in young adults
M.D. Lewkowski, S.N. Young, S. Ghosh, B. Ditto (Canada) 75

The relation between multiple pains and mental disorders: Results from the World Mental Health Surveys
O. Gureje, M. Von Korff, L. Kola, K. Demyttenaere, Y. He, J. Posada-Villa, J.P. Lepine, M.C. Angermeyer, D. Levinson, G. de Girolamo, N. Iwata, A. Karam, G. Luiz Guimaraes Borges, R. de Graaf, M. Oakley Browne, D.J. Stein, J.M. Haro, E.J. Bromet, R.C. Kessler, J. Alonso (Nigeria, USA, Belgium, China, Colombia, France, Germany, Israel, Italy, Japan, Lebanon, Mexico, The Netherlands, Australia, South Africa, Spain) 82

pain2: A neuropathic pain QTL identified on rat chromosome 2
J. Nissenbaum, H. Shpigler, A. Pisanté, S. delCanho, A. Minert, Z. Seltzer, M. Devor, A. Darvasi (Israel, Canada) 92

Proinflammatory cytokines mediating burn-injury pain
G.J. Summer, E.A. Romero-Sandoval, O. Bogen, O.A. Dina, S.G. Khasar, J.D. Levine (USA) 98

A randomised double blind trial of the effect of pre-emptive epidural ketamine on persistent pain after lower limb amputation
J.A. Wilson, A.F. Nimmo, S.M. Fleetwood-Walker, L.A. Colvin (UK) 108

Characterization of a model of persistent postoperative pain evoked by skin/muscle incision and retraction (SMIR)
S.J.L. Flatters (USA) 119

The influence of simultaneous ratings on cortical BOLD effects during painful and non-painful stimulation
A.L.A. Schoedel, K. Zimmermann, H.O. Handwerker, C. Forster (Germany) 131

Psychosocial predictors of health-related quality of life and health service utilisation in people with chronic low back pain
P. Keeley, F. Creed, B. Tomenson, C. Todd, G. Borglin, C. Dickens (UK) 142

doi:10.1016/S0304-3959(08)00100-0

Stage of chronicity and treatment response in patients with musculoskeletal injuries and concurrent symptoms of depression
M.J.L. Sullivan, H. Adams, D. Tripp, W.D. Stanish (Canada) 151
Distribution and properties of visceral nociceptive neurons in rabbit cingulate cortex
R.W. Sikes, L.J. Vogt, B.A. Vogt (USA) 160
Patient training in cancer pain management using integrated print and video materials: A multisite randomized controlled trial
K.L. Syrjala, J.R. Abrams, N.L. Polissar, J. Hansberry, J. Robison, S. DuPen, M. Stillman, M. Fredrickson, S. Rivkin, E. Feldman, J. Gralow, J.W. Rieke, R.J. Raish, D.J. Lee, C.S. Cleeland, A. DuPen (USA) 175
How does the self-reported clinical management of patients with low back pain relate to the attitudes and beliefs of health care practitioners? A survey of UK general practitioners and physiotherapists
A. Bishop, N.E. Foster, E. Thomas, E.M. Hay (UK) 187
Nociceptive sensations evoked from 'spots' in the skin by mild cooling and heating
B.G. Green, C. Roman, K. Schoen, H. Collins (USA) 196

LETTERS TO THE EDITOR

Response to: "Spinal cord stimulation: Stimulating questions"
R.B. North, J. Shipley (USA) 209
Authors' reply to the letter to the Editor by Richard North and Jane Shipley regarding the editorial, 'Spinal cord stimulation: Stimulating questions,' Pain 2007;132:10–11
J.A. Turner, R.A. Deyo, J.D. Loeser (USA) 210

Number 3 – April 2008

EDITORIALS

Don't ask, Don't tell? Revealing placebo responses to research participants and patients
F. Keefe, A.P. Abernethy, J. Wheeler, G. Affleck (USA) 213
Can the basis for central neuropathic pain be identified by using a thermal grill?
A.D. Craig (USA) 215

TOPICAL REVIEW

Enriched enrolment with randomised withdrawal (EERW): Time for a new look at clinical trial design in chronic pain
H.J. McQuay, S. Derry, R.A. Moore, P. Poulain, V. Legout (UK, France) 217

RESEARCH PAPERS

Changes in cardiovascular parameters and plasma norepinephrine level in rats after chronic constriction injury on the sciatic nerve
Y. Jin, J. Sato, M. Yamazaki, S. Omura, M. Funakubo, S. Senoo, M. Aoyama, K. Mizumura (Japan) 221
IL-1ra alleviates inflammatory hyperalgesia through preventing phosphorylation of NMDA receptor NR-1 subunit in rats
R.-X. Zhang, A. Li, B. Liu, L. Wang, K. Ren, H. Zhang, B.M. Berman, L. Lao (USA) 232
Modulation of pain ratings by expectation and uncertainty: Behavioral characteristics and anticipatory neural correlates
C.A. Brown, B. Seymour, Y. Boyle, W. El-Deredy, A.K.P. Jones (UK) 240
The impact of chronic pain in children and adolescents: Development and initial validation of a child and parent version of the Pain Experience Questionnaire
C. Hermann, J. Hohmeister, K. Zohsel, M.-L. Tuttas, H. Flor (Germany) 251
Chemotherapy-evoked neuropathic pain: Abnormal spontaneous discharge in A-fiber and C-fiber primary afferent neurons and its suppression by acetyl-L-carnitine
W.H. Xiao, G.J. Bennett (Canada) 262
Homologous and heterologous desensitization of capsaicin and mustard oil responses utilize different cellular pathways in nociceptors
N.B. Ruparel, A.M. Patwardhan, A.N. Akopian, K.M. Hargreaves (USA) 271
Neurotensin-produced antinociception in the rostral ventromedial medulla is partially mediated by spinal cord norepinephrine
A.V. Buhler, H.K. Proudfit, G.F. Gebhart (USA) 280
Pharmacological dissection of the paradoxical pain induced by a thermal grill
D. Kern, E. Pelle-lancien, V. Luce, D. Bouhassira (France) 291
Spread of excitation across modality borders in spinal dorsal horn of neuropathic rats
D. Schoffnegger, R. Ruscheweyh, J. Sandkühler (Austria) 300

LETTERS TO THE EDITOR

Pseudoradicular and radicular low-back pain: How to diagnose clinically?
K. Van Boxem, J. Van Zundert, J. Patijn, M. van Kleef (Belgium, The Netherlands) 311
Letter to the Editor of Pain on Freynhagen et al.: Pseudoradicular and radicular low-back pain – A disease continuum rather than different entities? Answers from quantitative sensory testing.
A.-S. Leffler, P. Hansson (Sweden) 312

Pseudoradicular and radicular low-back pain – A disease continuum rather than different entities? Reply to the letters by Leffler and Hansson and by Van Boxem et al.
R. Rolke, R. Freynhagen, A.-K. Rutjes, R. Baron, T.R. Tölle, S. Schu, R.-D. Treede (Germany) 313
The Classification of fibromyalgia
H. Merskey (Canada) 315
Reply to the Letter to the Editor by Prof. H. Merskey
T. Schmidt-Wilcke (Germany) 315
